Subject index

Ab initio 271
Alkoxy 25
Aminomethanol 211
Aromatic substitution 203

Bifurcating transition region 287
Bond order 129
Brester's equation 45

CAS SCF calculations for excited states 189
Character tables 31
Chemical potential 281
Chemisorption 231
Cluster calculations 231
Configuration interaction 175
Conformational equilibrium 271
Contour maps 287
Coset representation 45
Coupled cluster approach 65
Cyclopropylidene to allene 287, 327, 365
Cyclopropylidene to allene (substituted) 397

Density functional theory 281
Diatomic molecules 175
Disproportionation 241

Electric properties of electronically excited states 189
Electron affinity 25
Electron correlation 165
Electronic correlation effects 271
Electrostatic interactions between substituents 397
Enlarged configuration spaces 365
Ethylene glycol 271
Excited states of the water molecule 189
Extended basis sets 365
Extended Hückel 11

Generalized wreath products 31
Geometry of excited states of the water molecule 189
Graphical methods of spin algebras 65

Hardness 281
Helium and helium-like atoms 165
Hydrogen molecule 267

Intermolecular interactions in excited states 189
Internal rotations 211
Intramolecular interactions 271
Isomorphic orbital 1

Local energy 281

Many-electron correlation problem 65
Maximum bond order 129
Maximum bond order principle 129
Maximum overlap method 129
MNDO 203
Molecular device 1

Non-rigid molecules 31
Non-variational 175

Optimized inner projection 65
Orbital interpretation of electronic rearrangements 327

Potential energy surface 211, 287, 327, 365
Properties of excited states of the water molecule 189
Protonated trifluorobenzenes 203
Pseudo-lattice symmetry 231
Pseudopotentials 247

Recombination 241
Regular body 45

Site-symmetry 45
Spin-adaptation 65
Stationary points 211
Strained rings 287
Symmetry adapted functions 45

Total energy 11
Trajectory calculations 241
Transition metals 247

Unimolecular reactions 241

Valence bond 267
Van der Waals dimers 133
Variable exponent 165
Variance 281
Variational 175
Vibrational frequencies 133
Vibronic electron transport 1
